Introduction

This document describes how to install the XProtect Input Unit Plug-in for the Bosch IntuiKey Keyboard in XProtect Smart Client 32-bit version 2022 R2 and earlier.

This document assumes that you know how to operate the Bosch IntuiKey Keyboard.

A full description of the Bosch IntuiKey Keyboard is available in a document titled *Bosch Controller KBD Universal User Guide.pdf*, which installs on your computer when you install the XProtect Input Unit Plug-in.

Bosch IntuiKey Keyboard and XProtect Smart Client

Bosch IntuiKey Keyboard is a video control station that enables the user to view and control cameras and video recorders at local and remote facilities.

The XProtect Input Unit Plug-in for the Bosch IntuiKey Keyboard lets you use a Bosch IntuiKey Keyboard to perform tasks in XProtect Smart Client.

Please note that the plug-in is compatible only with 32-bit versions of the XProtect Smart Client, not with 64-bit versions.

There is no one-to-one mapping of Bosch IntuiKey Keyboard functions to XProtect Smart Client functions and vice versa. Some Bosch IntuiKey Keyboard functionality is not applicable for XProtect Smart Client, and XProtect Smart Client contains functionality not implemented in the Bosch IntuiKey Keyboard.

Install Bosch IntuiKey Keyboard

All communication between the Bosch IntuiKey Keyboard and the third-party PC is performed through an RS-232 interface. The following diagram illustrates this configuration:

This connection requires a standard Null modem RS-232 cable. Connect one end of the RS-232 interface cable to the 9-pin RS-232 Serial Port located on the far right side of the rear of the Bosch IntuiKey Keyboard. Connect the other end of the RS-232 interface cable to a COM port on the PC.

If the computer does not have an RS-232 interface, do one of the following:

- If you computer has a USB port, connect the Null modem RS-232 cable to a USB-to-RS232 converter
- To add a COM port, install a PC card

Install XProtect Input Unit Plug-in

You must have XProtect Smart Client 2016 installed. The XProtect Input Unit Plug-in does not support previous versions.

The XProtect Input Unit Plug-in for the Bosch IntuiKey Keyboard comes with an installer. To install the plugin, do the following:

- 1. To download the installer for the XProtect Input Unit Plug-in, go to https://www.milestonesys.com/downloads/ and download the appropriate installer for your computer.
- 2. Double-click Milestone_BoschIntuikey_Plugin_Installer.msi to start the installation.

	✓ I accept the terms in the License Agre	ement

- 3. To install the XProtect Input Unit Plug-in, accept the terms of the license agreement and then click **Install**.
- 4. When the installation is complete, click **Finish**.

Configure XProtect Input Unit Plug-in

To configure the XProtect Input Unit Plug-in in XProtect Smart Client, follow these steps:

1. Start XProtect Smart Client, and then click Settings in the upper right corner.

2. In the Settings window, click Bosch IntuiKey Keyboard Setup.

Configurable actions

The XProtect Input Unit Plug-in lets you map keys on the Bosch IntuiKey Keyboard to actions, or tasks, in XProtect Smart Client. You can map actions to numbers, or to specific keys.

For example, you might want to select a specific camera when you press the **CAM** key, or switch to a different view when you press the number **9**.

Configure combinations of numbers or keys and actions on the Actions Mapping tab.

The tab contains two groups. Map actions in each group as follows:

- Numbered Command map actions to numbers
- Keys map actions to specific keys on the keyboard

For each number or key:

- In the **Group** list, specify where to apply the action. For example, if you select **Views** you can select an action that is useful when you need to do something in a view. This might be when you want to go to the next view
- In the **Action** list, select the outcome of the action. The actions that are available differ, depending on the group you selected

You can map both a number and a key to the same action.

After you map keys or buttons to actions, you can use them in **XProtect Smart Client**.

- Numbered commands enter the number and then press ENTER on Bosch IntuiKey Keyboard
- Keys press the key on the Bosch IntuiKey Keyboard

Device settings

Joystick settings

Settings for joysticks are available on the **Device Settings** tab. The joystick tilt direction on the Bosch IntuiKey Keyboard is as follows:

- Forward Tilt the camera up
- Backward Tilt the camera down
- Right Pan the camera to the right
- Left Pan the camera to the left

The **Flip Up / Down** check box inverts these movements. For example, if you select this check box, moving the joystick forward tilts it down.

Adjusting the **Pan/Tilt** and **Zoom** sliders speeds up or slows down movements and zooming.

Actions Mapping Devic	e Settings Profile About			
Joystick Settings				
Pan/Tilt			Zoom	
Flip Up / Down				
Serial Port Settings				
COM Port:		Baud:		Parity:
