

Husky IVO 350R and 700R

**NOW CONFIGURE THEM AS
MANAGEMENT SERVERS**

PERFORMANCE, RELIABILITY AND EASE OF USE

Husky IVO™ 350R and 700R deliver on all counts as management servers

If you want to build an IT-server architecture that involves standalone server hardware for the XProtect® Management server, the Husky IVO 350R and 700R provide the performance and reliability needed.

The Husky IVO 350R and 700R provide the power to perform that is ideal for the mid-market, up to 500 channels. They provide a variety of security levels. The Husky IVO 700R has additional capabilities as it comes with redundancy on dual OS drives and power supply.

XProtect Management Server as a standalone server

Why should you want to create a standalone XProtect management server instead of having the software installed together with a recording server?

Because XProtect Management on a separate server enables you to configure XProtect Recording servers with failover (Corporate and Expert). Therefore, a separate XProtect Management and Recording server provides several opportunities to optimize the IT-setup and utilize the hardware server for specific tasks. This minimizes the downtime and data loss risk.

The additional opportunities are:

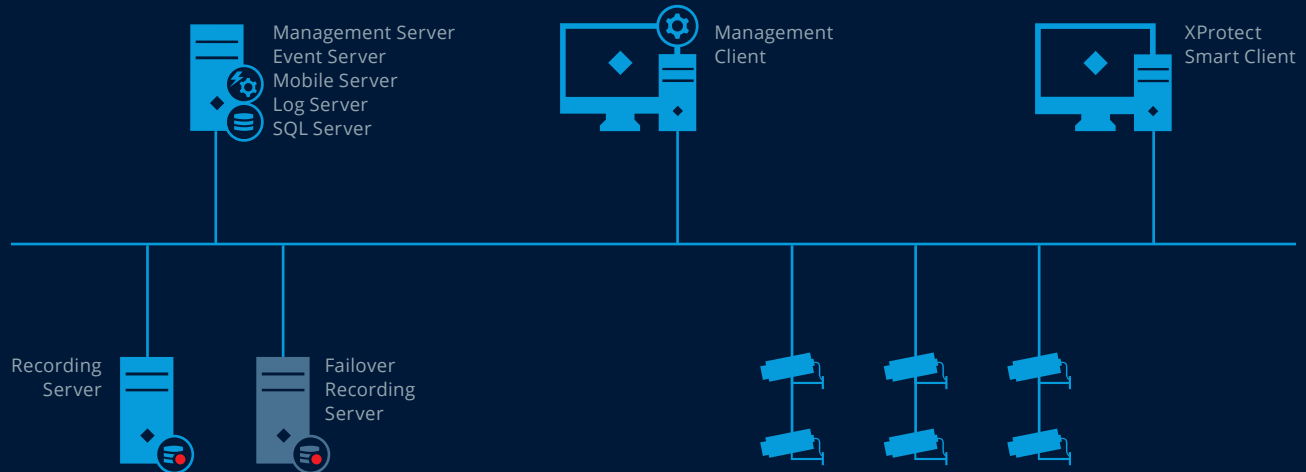

- You can further enhance your IT-setup, building failover Recovery Servers.
- You can use Husky IVO and leverage on proven technology and service.
- You get the ability to further enhance your IT-setup with Milestone Management Server Failover (Corporate and Expert) to minimize the risk of downtime and lost data.

SQL Server recommendations

- For installations with less than 300 channels, the free SQL database Server Express edition can often be used, but be aware of retention, event, and log servers. For more information see the System Architecture Guide for IT Professionals on Content Portal.
- For larger systems, it is recommended to use the Microsoft SQL Server Standard or Enterprise edition.

XProtect server setup

Illustration below show the enhancement of the IT-setup, having Recording Server configured with failover, due to the Management Server as standalone

XPROTECT® MANAGEMENT SERVER FAILOVER

Milestone add-on Management Server Failover further strengthens the security and uptime on the Management Server.

POWER TO SAVE TIME

Easy to install and set up

From choosing the units to installing and maintaining them, Milestone Husky IVO 350R and 700R are all about convenience and ease-of-use. You save time on choosing drivers and software, as well as with configuration. As XProtect comes pre-loaded, you're practically ready to go when you plug it in.

POWER OF PEACE OF MIND

Support whenever you need it

The existing Milestone support makes it easier to get the right support at the right time. Enjoy peace of mind, thanks to a single point of contact. Plus, Husky IVO 350R and 700R models both come with a five-year warranty and a seamless support setup in collaboration with Dell Technologies.

About Milestone

Milestone Systems is a leading provider of open platform video technology software that helps the world see how to ensure safety, protect assets and increase business efficiency. Milestone enables an open platform community that drives collaboration and innovation in the development and use of network video technology, with reliable and scalable solution that are proven in more than 500,000 sites worldwide. Founded in 1998, Milestone is a stand-alone company in the Canon Group.
